Office Action Summary

Art Unit: 1774

1. Claims 4-13, 15 and 17-19 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim these claims have not been further treated on the merits.
2. Claims 1-3, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Verschueren et al. (EP 0785088).

Verschueren et al. teach a receiver medium for digital imaging comprising a substrate having a dye-receiving surface bearing a coating comprising a dendrimer (see page 5, lines 18-10). The experimental modification of this prior art in order to ascertain optimum operating conditions (e.g., determine the Tg of the polymer) fails to render applicants' claims patentable in the absence of unexpected results.
